Summary

Explain It

The Volcano That Changed Weather Around the World

Put the reading out of sight and your notes face down. Explain the topic in words or drawings that make sense to someone new.

1) Why did Tambora's danger continue after the mountain stopped erupting?

2) How did one eruption in Indonesia change weather on the other side of the world?

3) How could damaged harvests turn unusual weather into a larger human crisis?

After you finish, reopen the reading and notes. Use a different color to add, correct, clarify, or mark an idea as held up.
